Agenda

- How to avoid under-reporting and make data collection easy
- How to create a systematic approach to data collection and ensure your data quality
- How to make best use of your data
- How to easily communicate your key HSE and risk performance indicators
- Q&A

Do we put our reputation at stake?

Is the data 100% correct and reliable?

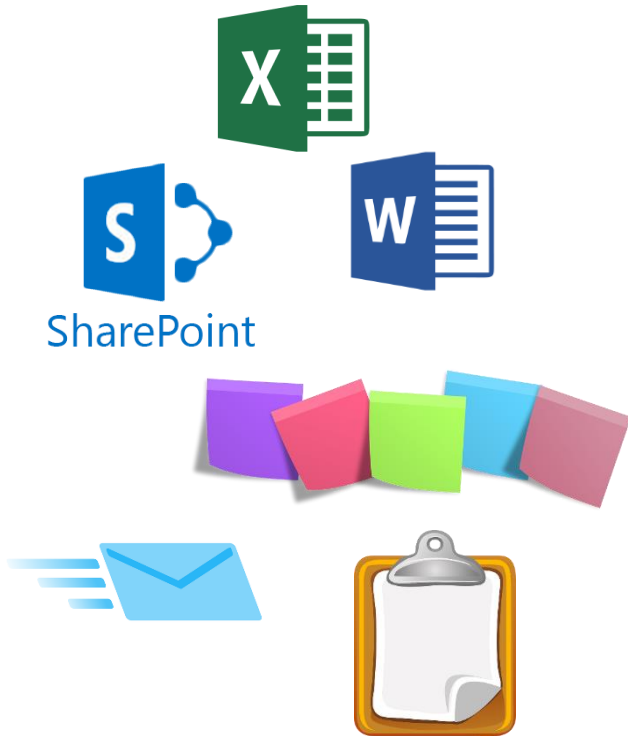

Do I have all the relevant information available?

Are our employees safe at work?

How do you handle QHSE and Risk reporting today?

Ungraded

Non-systematic vs. Systematic

Synergi™ Life

" Turning safety critical businesses into data smart organisations"

Synergi Life – supporting the learning loop

Product structure – the Synergi Life Sphere

- **The Synergi Life Engine**

- Consists of the elements needed to run Synergi Life in the Client environment

- **Synergi Life Modules**

- Synergi Life is a module based solution covering the full Risk and HSEQ Management process.

- **Synergi Life Interface Products**

- Built on Synergi Life's scalable and modular architecture, Synergi Life Interface Products provide a range of useful additions, which will enhance the client's benefit of Synergi Life and reduce Total Cost of Ownership.

Comprehensive QHSE & Risk Management Software
